

# Installation Powerpoint template

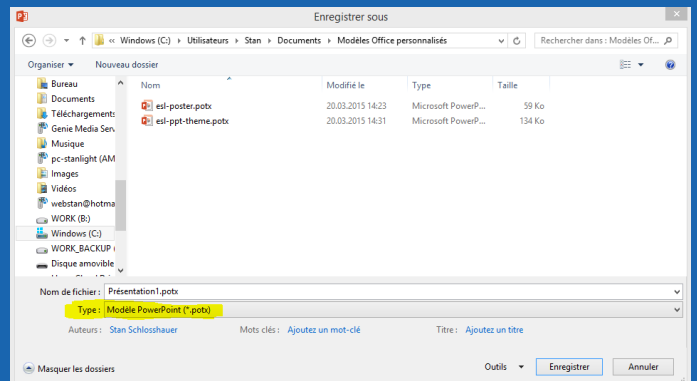

Open the « .potx » file

Click “File” and “Save as”  
Then select “Computer” and any folder you want.

On “Type” select “\*.potx”.  
The path will be automatically set to the Office template path.  
Click “Save”

When you open a new document  
you should now see the template in  
your “Personal” section.
